

Mission: Wellness

October 2005

We are seeing many blessings happening in the world of wellness with the gift of glyconutrients & cellular restoration. We care for you all and our mission is to educate and empower you to take control of your health naturally. Blessings to you all! ~ Shane & Joy

THE FIVE SYSTEMS OF THE BODY

Are all **five systems** of your body running smoothly? If your body is not working properly, you need to look at the outward symptoms to determine which system needs to be fixed.

Just like a car in order to fix a specific system you need to diagnose the problem and purchase the appropriate parts to fix it.

In the same way **your body needs the proper nutrients to run properly** and fix itself as the Creator designed it to do.

System #1 – The Elimination System

*** Part 1 of 5 *** Next Newsletter – System #2 – The Immune System

GOAL – Healthy & Clean Elimination System (i.e. Colon, Kidneys, Liver, Lymph, Blood, etc...)

Principle #1 – The elimination system is the body's "sewer" system. The body's ability to heal itself is directly related to its ability to cleanse itself.

Principle #2 – Nutrients are assimilated in the intestines (small and large colons).

Principle #3 – Toxicity of the Elimination System is a major contributor to sickness and disease. Often our "sewer" system is either built up fecal matter or is "backed up".

- The average American carries between 12-16 pounds of fecal matter impacted in their large intestine (colon). Undigested food is also part of this which causes heart burn and other issues.
- Impacted matter seeps through the colon wall into our blood stream and depresses our Immune System
- Impacted colons are due to a high fat diet in America and lack of regular cleansing
- The U.S. Recommended Daily Allowance (RDA) of fiber is 100 calories per day (of 2,000 cal/day)
- Colon Cancer has become the number 3 cancer in America
- Our foods today have few active enzymes-enzymes digest proteins, fats and carbohydrates as well as other functions
- Many sicknesses and diseases find their roots in toxic Elimination Systems
- We carry toxins in our fat cells from childhood

Some Possible Symptoms of a Toxic Elimination System:

Inflammation	Fatigue
Obesity	Liver Disease
Arthritis	Diabetes
Allergies	Disease
Constipation	Colon Cancer
Diarrhea	Hemorrhoids
Diverticulitis	Hay Fever
Acid Reflux	Irritable Bowel Syndrome

Don't hesitate to contact us if you have any questions or want to take back control of your health! Wellness is our mission/ministry and we want to share this technology/gift with the world!

"There are only two obstacles to vibrant health and longevity: ignorance and complacency."

Steps Toward Correction:

- It is essential to modify diet to a **higher fiber diet**
- Take a maintenance cleansing product that contains **probiotics & good flora**
- Take **enzymes that break down all foods** and are **two phase** (stomach/small intestine)
- Maintain **daily water (purified) of at least 8-10 oz.** glasses per day

*"I attend to Your Word Lord God,
I keep it in the midst of my heart.
It is life to me and health to all my flesh."
Proverbs 4:20-22*

MannaCLEANSE – Intestinal Health Support and Added Beneficial Flora

Designed to help the body's digestive system by supporting: the natural ecology of the intestines, the body's ability to fully break down food particles, the body's ability to expel unused or unneeded material.

GI-PRO – Supports Healthy Digestive Flora

Beneficial "friendly" bacteria help keep your digestive system running smoothly, help regulate the delicate balance that exists between the bacteria you need for a healthy intestine, provides enough of the beneficial bacteria to boost the health of the immune system – your body's essential natural defense system.

GI-ZYME – Supports Digestive Absorption

Specifically formulated to help maintain a normal, healthy level of digestion and nutrient absorption; assists in breaking down of proteins, fats and carbohydrates; has triggered dual-action phases that are active in the stomach and small intestine; has triggered dual-action phases that are active in the stomach and small intestine; helps in the prevention of occasional gas, acid stomach and indigestion; helps regulate and maintain healthy stool weight and total daily fecal excretion, and contains amylase and lactase, which support normal healthy digestion of gluten proteins.

Mannatech

Receives Patent in U.S. for Ambrotose®

(Glyconutrient Complex)

This brings closure to the patent process while securing our strategic position in the expanding wellness industry.

In addition to the **U.S.**, the company now holds registered patents on its Ambrotose® complex in **Australia, France, Germany, Hong Kong, Ireland, Italy, Liechtenstein, Malaysia, Mexico, New Zealand, the Philippines, Singapore, South Africa, the Republic of Korea, Spain, Switzerland, Taiwan** and the **United Kingdom**.
